

# Klauke®

## Product Change Announcement

Klauke FMS L-Series cable lugs are now discontinued and will be replaced by the MS L-Series cable lugs.

The two ranges are **identical** apart from the entry to the barrel. The FMS has a flared entry whereas the MS has a straight external barrel.

To ensure the easy entry of class 5 cables is maintained, an increased internal chamfer or "i-Flare" has been implemented on the new MS series.

### What you need to know:

- There is **NO CHANGE** to crimping dies or tooling. Existing tools and dies can be used.
- Neater finish after crimping (No raised diameter on flared section)
- Accepts larger variety of cable types
- Pricing remains the same as FMS
- Improved stock availability and shorter lead times
- Orders received for FMS will automatically convert to MS

OLD FLARED STYLE
