

The clamp is punched, which increases the number of screw threads by 30% meaning a high torque resistance

The TE Connectivity exclusive anti-release system creates a controlled locking-screw effect thanks to the 2 overlapping tabs that maintain the clamp parts. The screw is locked in total safety. The retightening campaigns are not needed anymore!

The screw tightens the conductive bar to the cable. There is no torsion effect applied to the cable

Hardened steel makes the connection very reliable

Flap avoiding the insertion of cable underneath the clamp
