DuraLabel Toro®

Independent, Standalone, Mobile 4" Label Printer

Take your work into the field with the tough, portable Toro. The standalone label printer supports labels up to 4" wide and comes preloaded with LabelForge™ and DuraSuite™ label software that makes designing, printing, and meeting label compliance easier than ever.

DuraLabel SMART CHIP technology

Independent

- No network connectivity required
- No IT support required
- No plug/outlet required with battery

Standalone

- Built-in full-size, flip-down keyboard
- 9" touchscreen with four different positions
- Pre-installed OSHA/ANSI compliance & custom label design software

Durable Labels

- Legible, long-lasting labels (300 dpi)
- 40+ application-specific supplies
- Prints on ½"–4" supply widths
- Labels are moisture, UV, chemical, & abrasion resistant
- Prints on continuous & die-cut supplies

Smart Chip

- Identifies which supply is loaded
- Prompts for calibration & ribbon changes
- Auto-selects supply settings
- Displays remaining available supply
- Warns when supply is low & provides re-ordering information

Ammonia Pipe Marking Guide

This guide follows International Institute of Ammonia Refrigeration (IIAR) Bulletin No. 114, as revised in 2014. Facilities using an older version of the standard may continue to do so, as long as their usage is consistent and documented.

Ammonia Pipe Markers – Five-Part Labels

LTRS | LIQ | VAP | AMMONIA | LOW | →

1   2   3   4   5

1. **Piping Abbreviation**
   Identifies the part of the system with text printed in black on an orange background. Abbreviations are recommended; see table of *Piping Abbreviations*. If additional identifying information is needed, include it here.

2. **Physical State**
   • For liquid ammonia, show "LIQ" in black on a yellow band
   • For vapor, show "VAP" in black on a sky blue band
   • If both states may be present, both elements may appear

3. **Pipe Contents**
   The word "AMMONIA" should be printed in black on an orange background.

4. **Pressure Level**
   • For contents at 70 psig or less, show "LOW" in black on a green band
   • For contents above 70 psig, show "HIGH" in black on a red band

5. **Flow Direction**
   Show the direction of flow with directional arrows, printed in black on an orange background. The arrows may appear at one or both ends of the label, and may repeat around the circumference of the pipe if desired.

Pipe Marker Dimensions

Outside Pipe Diameter Including Covering		Minimum Marker Height		Minimum Marker Length		Minimum Height of Letters		Min. Width of State/Press. Bands	
Up to 1.25"	32 mm	1"	25 mm	8"	203 mm	.5"	13 mm	.5"	13 mm
1.25" - 2"	32 - 51 mm	1.5"	38 mm	8"	203 mm	.75"	19 mm	.75"	19 mm
2" - 7"	51 - 178 mm	2.5"	64 mm	12"	305 mm	1.25"	32 mm	1"	25 mm
7" - 10"	178 - 254 mm	3.5"	89 mm	24"	610 mm	2.5"	64 mm	1.5"	38 mm
Over 10"	Over 254 mm	4.5"	114 mm	32"	813 mm	3.5"	89 mm	2"	51 mm

Pipe Marker Locations
• Before and after any change in pipe direction. If the pipe ends at equipment or changes direction again within 24 inches (61cm), the label in the short space may be omitted.
• Before and after any wall, ceiling, or floor penetration.
• No farther than 40 feet (12m) apart on extended runs of pipe.
• At least once in each room or area through which the pipe passes.

System Component Markers - Two-Part Labels

ACCUMULATOR | LOW

1   2

1. **Component Identifier**
   Name the component with black text on an orange background. Abbreviations are acceptable; see the table of *Component Abbreviations*. If additional identifying information is needed, include it here.

2. **Pressure Level**
   • For contents at 70 psig or less, show "LOW" in black on a green band
   • For contents above 70 psig, show "HIGH" in black on a red band

Component Marker Dimensions
• At least 3.5 inches high
• Lettering at least 2.5 inches high
• Marker length will vary to allow for the length of the component name
• Pressure level band should be at least 1.5 inches wide

IIAR Suggested Pipe Color Scheme

In addition to the detailed labels, it may be helpful to include a color code for refrigeration system pipes. These colors may be applied as paint over the length of the pipe, or as bands of color applied periodically, as sufficient for pipe recognition. IIAR Bulletin No. 114 suggests the color scheme shown at right.

Color	Pipe Designation
Orange	High Pressure Liquid
Yellow	High Pressure Vapor
Sky Blue	Low Pressure, High Temperature Liquid/Vapor
Blue	Low Pressure, Low Temperature Liquid/Vapor
Purple	Low Pressure, Very Low Temperature Liquid/Vapor
Gray	Pressure Relief Vent piping
Green	Nonvolatile, Non-pressurized Process piping

This, or any other pipe coloring scheme, should only be used in conjunction with a clearly posted legend or key describing the color scheme in place.

How To Choose a Chemical Label

IS IT HAZARDOUS? — No → Label it clearly and specifically as a non-hazardous material. →

Water
