

i10-L Insert wire markers

expressMARK i10-L is comprised of a printed strip, which is inserted into a protective clear carrier. The clear carrier can be applied to wires and cables pre-termination to allow post termination insertion of the printed strip. The strips can also be replaced post-termination when re-labeling is required. The clear carrier protects the marker strips from dust and grime and are available in a number of sizes to cover a wide range of cable diameters.

Ordering information
