KROY®

Kroy (Europe) Ltd, provides labelling & identification solutions to a diverse range of industries including, electrical, electronics, warehousing, distribution, rail & transportation, automotive, offshore exploration, marine, medical, military, civil & general aviation and health and safety.

We distribute a wide range of thermal transfer and direct thermal printers including portable hand-held printers for “On Site - On Demand” applications, low cost - low volume entry level printers, medium to high volume rugged industrial models and high quality, high resolution printers for the production of labels requiring high density text, graphics and barcodes.

To complement our printer hardware, we offer an extensive range of labelling and identification products for many applications and environments. From thermal transfer printer ribbons, simple paper labels, economy grade synthetics and vinyl's through to high temperature resistant and high-performance labels, rating plates & over-laminating films.

Kroy (Europe) Ltd provide wire & cable marking solutions and offer a variety of commercial grade, UL MIL and LUL specification heat shrink tubing. We also offer a range of tubing that meets or exceeds the Boeing Material Standards (BMS) approved for Marking & Fluids Resistance. Our range of self-laminating cable markers facilitates the easy identification of wires and cables after final termination has been completed.

A large number of our labelling products are compatible with a wide range of industry standard printers including Zebra, TSC, Labelzone, Brady, CAB etc.

We offer a bespoke full colour label, sign and banner printing facility, utilising our wide format UV LED printers and can produce graphics etc up to 1.3 metres in width on a wide variety of materials.

Kroy Europe Ltd., are suppliers to many national and international organisations and companies across a wide range of industries. We are an ISO 9001:2015 registered company and members of FINAT. We are registered suppliers to the Railway, Offshore Oil & Gas and the Utilities Industries through RISQS, First Point Assessment (FPAL) and the Utilities Vendors Database (UVDB) respectively.

We take pride in supplying quality products at fair prices, backed up with excellent after-sales and customer care provided by a team of highly motivated and dedicated staff.

Barrie Hamilton
Director
Kroy Europe
July 2019

Welcome to the NEW 2019 KROY catalogue

Over the last 38 years, Kroy have amassed a wealth of experience in providing identification products for a diverse range of applications and environments. We are an environmentally and socially aware organisation, a registered WEEE producer and our labelling and identification products meet or exceed current REACH and RoHS legislation.

Whether you need to identify cardboard cartons or complex electronic components, a piece of hardware or subway train cables & control gear, laboratory samples or electrical cables & switch boxes, assets or equipment - Kroy can help with your labelling and identification requirements.

If you cannot find a particular product that you are looking for or just need further information, please call us - 0118 986 5200 we will be happy to help.

Selecting a label printer

In order to select the best label printer for your needs, several criteria need to be addressed:

- **Label width required?**

- **What is the expected life of the label?**

Direct Thermal labels (no ribbon required) have a short-term life expectancy and are affected by UV light & heat

Thermal transfer labels (ribbon required) longer life labels especially on synthetic materials such as polyester, PVC etc.

Note: Thermal transfer printers will also print thermal labels requiring no ribbon.

- **What type of label do you want to print?**

Paper – generally, short lived for postage, packaging, point of sale, warehouse applications etc.

Synthetics such as polyester are hard wearing, abrasion resistant labels

PVC labels are conformable to irregular curved surfaces

Heat & Chemical resistant labels have special coatings and require specific printer ribbons

Heat shrink tubing – flattened tubing for wire, cable, hose and pipe identification.

- **Printing volumes –how many labels you need to print at any one time?**

Desk-top printers: are inexpensive and ideal for small volume applications – small footprint where space is at a premium e.g. offices, laboratories, small production facilities etc. The Kroy K4452/K4453, ME240 and ME340 series are compact and print the same quality and wide range of media as the larger industrial printers.

Industrial printers: are designed for higher volumes, demanding, mission critical situations, where printer down time may cause disruption of production. With faster print speeds up to 14” (ips) per second (depending on the model selected), robust cases, metal chassis, and designed for demanding environments and applications the Kroy K5400, MB240/340 and K8300 series are all very capable models for industrial use.

- **Label content:**

Will your label contain text, barcodes, graphics?

The industry standard of 200dpi (8 dots per mm) resolution for general use printers is suitable for text and most barcode symbologies.

The higher resolution of 300dpi (12 dots per mm) is ideal for labels that contain some types of graphics, barcodes and more intensive amounts of text. 600dpi resolution (24 dots per mm) is ideal for small labels with a high density of text, graphics and barcodes.

- **Connectivity:** How is the printer going to be connected? Do you need ethernet, wireless, USB or parallel cable?

- **Printer environment:** Where will the printer be installed? - Office, Warehouse, Manufacturing etc.?

- **Are any accessories required:** Automatic cutter, Peel-off sensor, internal label re-wind, shrink tubing guides, external roll holders etc.

Portable & desktop printers for office and industrial applications:

The LW-600P, LW-700 and LW-Z700FK are versatile easy to use printers for the production of self-adhesive labels, tapes, heat shrink tubing and self laminating cable markers.

With drop in cartridges, they are ideal for on-site - on demand identification tasks. Battery and or mains powered and complete with Windows drivers, labelling application, cable and mains adapter. The LW-600P and LW-710 are bluetooth capable and an “app” is available to create and print from your smart phone or tablet.

Epson - LabelWorks Printers

Model No.	Part No.	List Price

* Please note: the use of non-genuine supply cartridges that are not manufactured by Epson and do not carry the genuine EPSON logo, may damage the print head and print mechanism. Damage caused by the use of non-genuine cartridges may invalidate any warranty or guarantee.

Desktop label printers

Desk-top label printers for low to medium volume printing of labels, tags, heat shrink tubing, self-laminating cable markers and continuous roll media. Ideal for offices, small manufacturing / production facilities, laboratories, schools etc., and where space is at a premium.

Kroy - Desk-top Label printers

Unless otherwise stated printers are delivered with Bartender Ultralite Labelling software, windows drivers, USB printer cable, power cord and AC adapter where applicable.

Thermal transfer printer ribbons

For a wide variety of label printers including Kroy, TSC, Zebra, Brady etc.

Premium quality ribbons in wax, wax resin and resin for those demanding printing tasks. Our wax ribbons are suitable for most paper labels and require low print head energy and give excellent contrast when printing text, barcodes and graphics.

Wax resin offers the maximum abrasion resistance when printing paper and synthetic labels

Our resin ribbon offers the maximum resistance to chemicals, water and abrasion when used in conjunction with synthetic labels such as polyester, vinyls, polyamides etc.

The ribbons shown below are our most commonly used types, sizes and colours. Other ribbon types, sizes and colours are available, please call for full details.

Thermal transfer ribbons - Wax 25mm core - outside inking

size (length x width) metres x mm	Part No.	Colour	Price per roll
300 x 110	Z*0433*985W	Black	£10.53
450 x 110	Z*0433*1476W	Black	£13.69

Note: Wax resin ribbons give a more durable image when printing on most paper labels

Polyester labels and continuous rolls

Self-adhesive polyester labels for a wide range of applications including, durable goods labelling, equipment identification, rating plates, barcode labels and signs. Available in standard stock sizes and continuous rolls. Use Kroy premium resin thermal transfer ribbons for the best results.

Product codes 7871 and 7872 have a heavier coat weight of high holding acrylic 350 type adhesive, ideal for low surface energy and textured surfaces.

Custom sizes and pre-printed labels are available to order.

Vinyl continuous rolls

Premium 2.0 mil monomeric vinyl with permanent adhesive for applications requiring a general purpose UV resistant material. For interior and exterior use and guaranteed for up to 2 years, the vinyl is very flexible, UV, chemical and water resistant. Continuous rolls allow you to produce labels, signs etc., up to the limitations of your printer.

Available in 7 colours- other colours and die-cut labels are available to order, please call for details.

Bespoke labels and signs

Kroy offer bespoke signs, decals and labels for a wide ranging applications, from the local hockey club banners, scaffolding banners, customised labels with intricate shapes, care home labelling, fire extinguisher labels, through to large volume labels in a variety of shapes for cycle hire liveries to name but a few.

Labels and signs etc. can be produced on a wide variety of different materials in full colour up to 1.3metres in width. The inks used are UV resistant and depending on the material used will last many years in exterior situations.

For further information, quotations and samples please call +44 (0) 118 986 5200 or email sales@kroyeurope.com

Self-laminating wire and cable markers

Rolls of self-laminating wire and cable markers for the easy identification of wires, cables, tubes etc. Especially useful where final termination has taken place or at points of restriction, where cables and wires pass through bulkheads and where the use of clip on markers or tags is impractical.

Step 1: Print and attach edge of wire wrap to wire or cable

Step 2: Wrap "tail of wire wrap around the wire/cable and over printed area

Step 3: Apply pressure to end of "tail" to ensure adhesive bond - **Job done!**

Wire & cable markers - self-laminating on rolls(25mm core) 3.5mil translucent vinyl with either yellow or white printable areas on each label. The clear "tail" over-laminates and protects the printed area. Aggressive permanent acrylic adhesive allows ultimate adhesion to difficult substrates including wire insulation materials, plastics and metals. Ideal for use in harsh environments - UV, temperature, chemical, water and abrasion resistant.

Wire wraps - White printable area

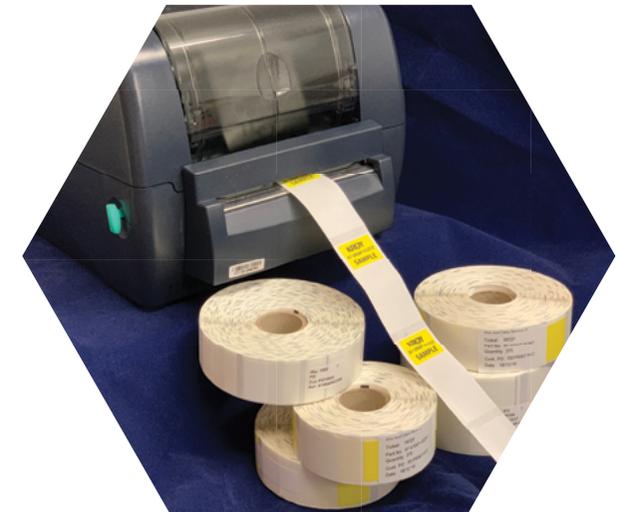

Wire wraps -Yellow printable area

Fits most thermal transfer printers that have a black mark sensor and accept 25mm cores

Heat shrink on bulk reels

Flattened, printable heat shrink tubing in various grades, types and recovery ratios from 2:1 commercial grade tubing up to high performance zero halogen tubing for use in confined spaces and specialised environments. The Premium PNHP (NH[TW]) Zero Halogen tubing is approved for use by London Underground and meets the Boeing Aircraft Corporation materials standards for marking and fluid resistance - BMS 13-69A, when used with the specific Kroy printer ribbon.

Whatever the application, Kroy's range of easy to use wire and cable marking systems and supplies make your identification tasks simple and straightforward.

Tags and Raised Panel labels (RPL)

Printable zero halogen tags ideal for identifying, wires, cables, hoses etc. Pre-punched holes allow quick attachment using cable ties, cord, clips, wire etc. Our tags are suitable for use where zero halogen materials are specified.

RPL

Printable die-cut panel labels with a durable polyester surface and a bonded adhesive layer on the reverse. Ideal as an alternative to engraved or etched plastic plates etc.

Tags and Raised Panel Labels (RPL)

Please note: prices of the tags and raised panel labels are subject to currency exchange rate variances - please call for current pricing

Wire and Cable markers - Self-laminating (wire wraps)

4.0mil translucent vinyl with a white printable area on each label. The "clear tail" over-laminates and protects the printed text. Aggressive permanent adhesive resistant to flagging allows adhesion to difficult substrates including wire insulation materials, plastics and metals. Ideal for interior and exterior use. UV chemical, water and abrasion resistant. Temperature resistant -40°F - +176°F (-40° - +80°C)
